

Reliability & Safety

To be expected on every load.

Being leaders in freight transportation means investing in technologies that enable you to do so in the most efficient, safe, and reliable way possible, as well as in outstanding office talent to oversee the process. At GP Transco, we pride ourselves on utilizing the most advanced technologies and employing a highly qualified staff, which translates to the best possible results for our customers.

Features

**Dual-Facing
Truck Cameras**

These provide continuous monitoring of GP Transco trucks and drivers, with automatic recognition and notification of harsh events or anything unexpected throughout the delivery process

**GPS on Tractors
& Trailers**

Each tractor and trailer at GP Transco is equipped with GPS tracking, allowing complete visibility into the assets and freight, with to-the-second information on status

**Automated
Geofencing**

This advanced technology automatically recognizes and updates the phase in which the tractor and load are currently in and automatically notifies the customer when a load is picked up, in transit, and is delivered

**Outstanding
Drivers**

On average, a GP Transco driver has over a decade of experience. Prior to joining the company, the drivers go through a rigorous selection and recruitment process. We are one of the highest-paying carriers in the nation, which allows us to be selective and hire truly outstanding trucking professionals.

**Advanced
TMS System**

Our in-house developed Transportation Management System OpenRoad TMS is designed to give the company complete 24-hour, to-the-second visibility of assets and loads, making sure every single GP Transco truck is busy serving our customers and is consistently delivering on time

**Modern
Tractors &
Trailers**

While the average age of semi-trucks in the U.S. is 14 years, the oldest age of a GP Transco truck is three years. Trucks are continuously phased out for newer and better ones, and are equipped with advanced features such as collision avoidance, advanced aerodynamics, clean fuel-efficient engines, remote connectivity, and more

**Truly 24-hour
Operation**

GP Transco operations run 24 hours a day, 365 days a year, with team members overseeing the status of loads and trucks and being able to quickly adjust to challenges that might arise at any time of day or night

**Dedicated
Safety Team**

Drivers are assigned a dedicated safety manager, and each driver's work behavior is constantly monitored via our live-feed dashboard cameras, in-truck accelerometers, and other advanced features, all of which trigger any harsh events that may happen on the road and are addressed and resolved immediately
